

PROGRESS REPORT

Nourish to Flourish

Construction Updates

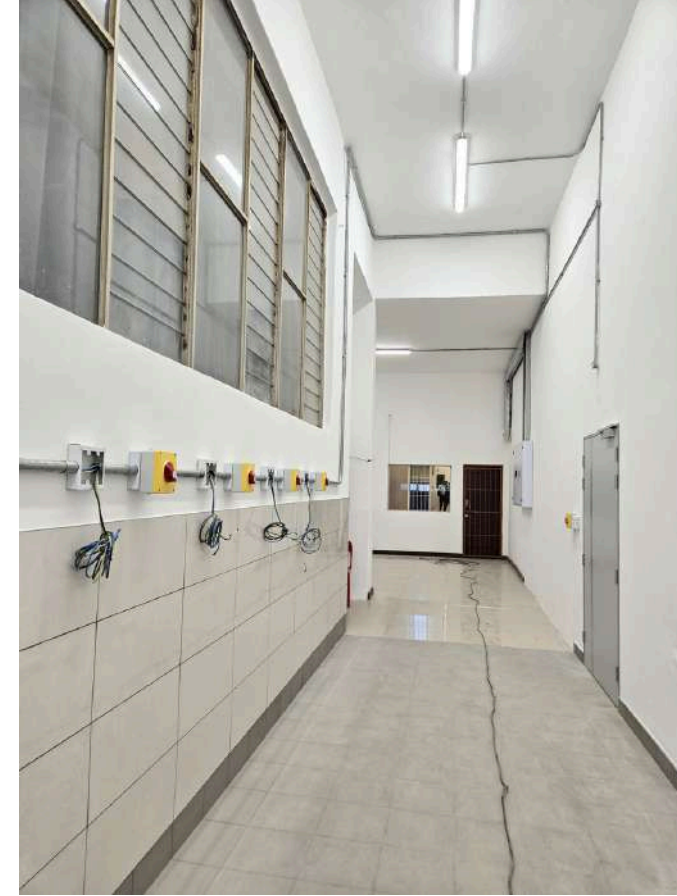

August 2024

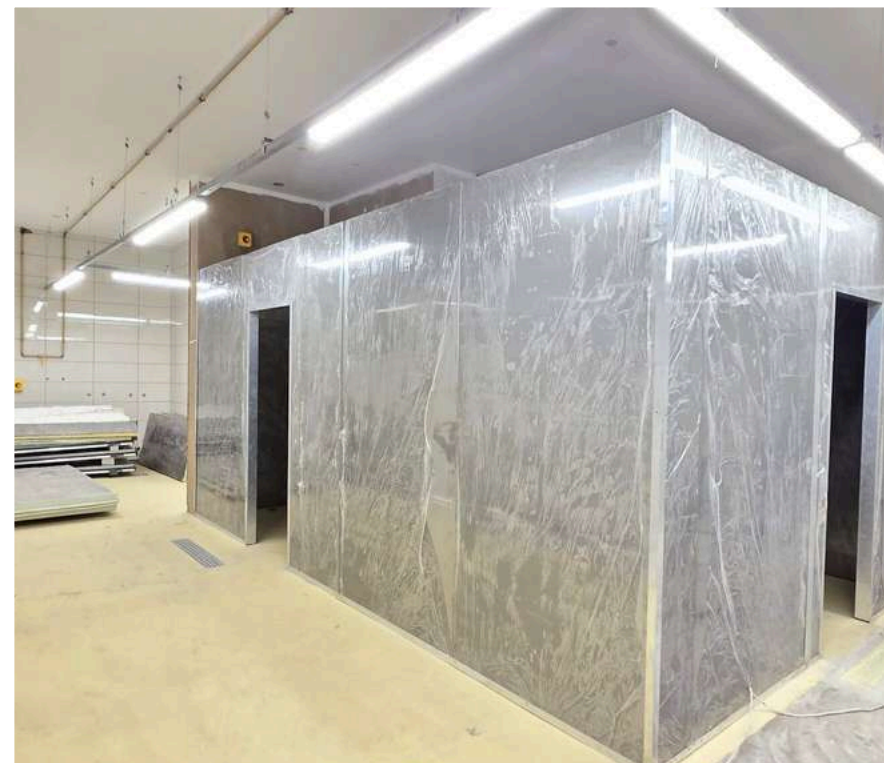

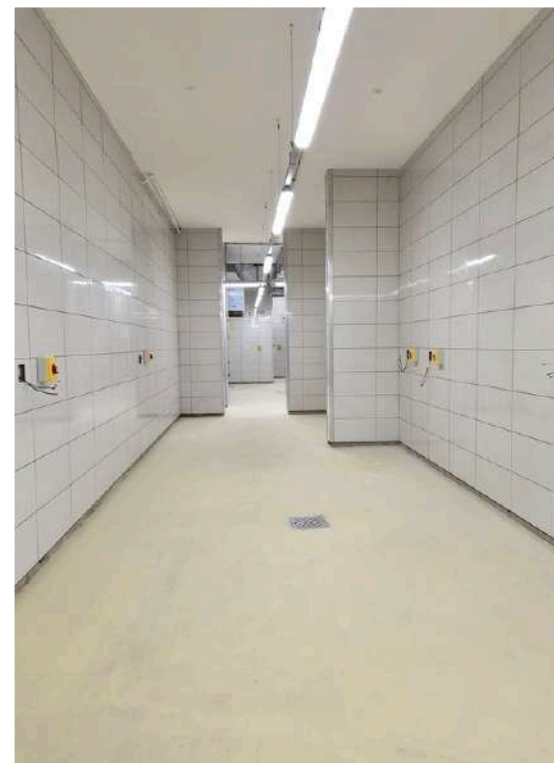

Main Kitchen Area

With Steam extractors for Ventilation and space for Roti Maker Equipment

Installation completed for Electrical systems, Plumbing systems, HVAC system and Fire suppression systems

Cold Storage Area

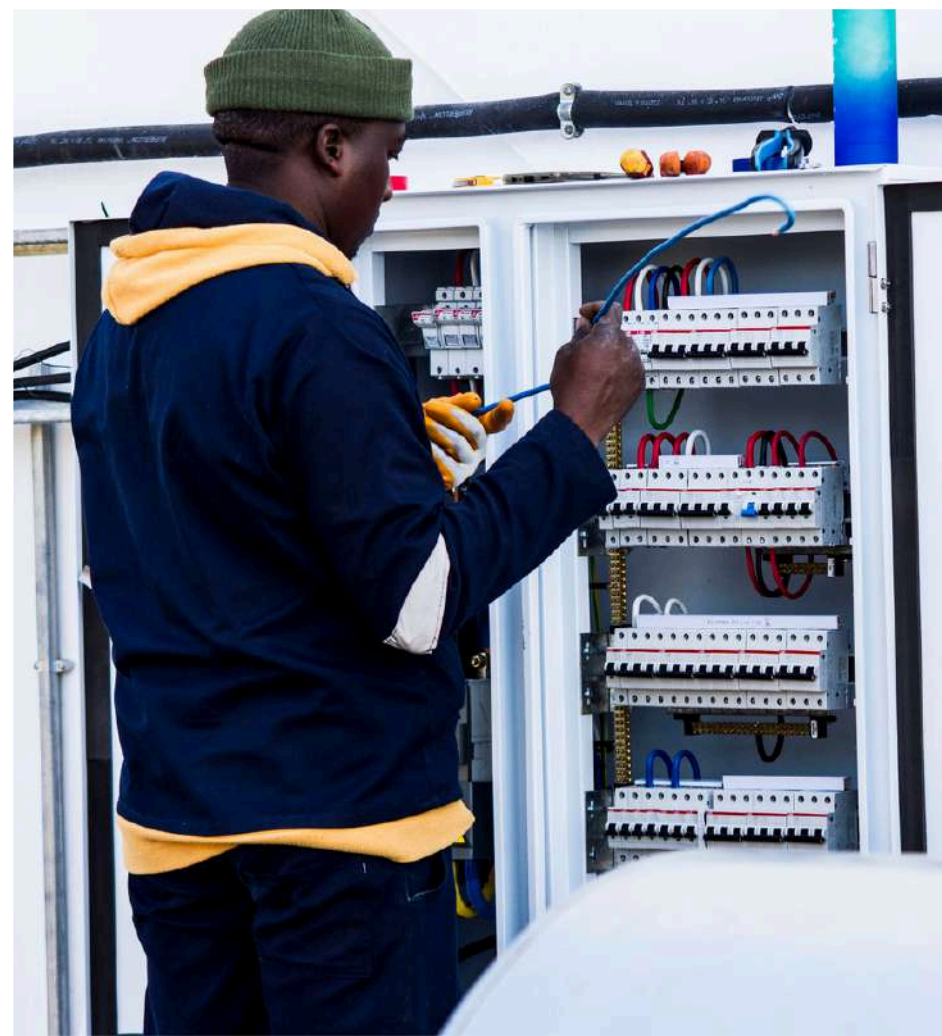

01

N2F New KITCHEN

The industrial kitchen construction is nearing completion, featuring robust flooring, walls, and ceilings designed to withstand the rigors of heavy food preparation. A state-of-the-art ventilation system has also been implemented to ensure optimal air quality and safety. Additionally, the kitchen is equipped with energy-efficient equipment and sustainable materials to minimize its environmental footprint.

02

SUBSTATION & ELECTRICAL GENERATOR

INFRASTRUCTURE ESSENTIALS
INSTALLATION COMPLETE

Upgraded Electrical System and Supply
has been installed

FLOORING WORK

The flooring installation is now complete, with a durable and slip-resistant epoxy coating applied to the entire area. Flooring material meets all safety standards and regulations, ensuring a secure working environment for staff.

ROOF SLAB

The roofing professionals, including roofers, contractors and architects have worked together to design and install the building's roofing system such that it meets all building codes, and ensures safety and sustainability.

Roof Level installed with Ventilators, Makeup Air ducts, Compressors and Electrical supply to the Compressors

Large-scale Industrial Heat Pumps

FINISHED ROOF

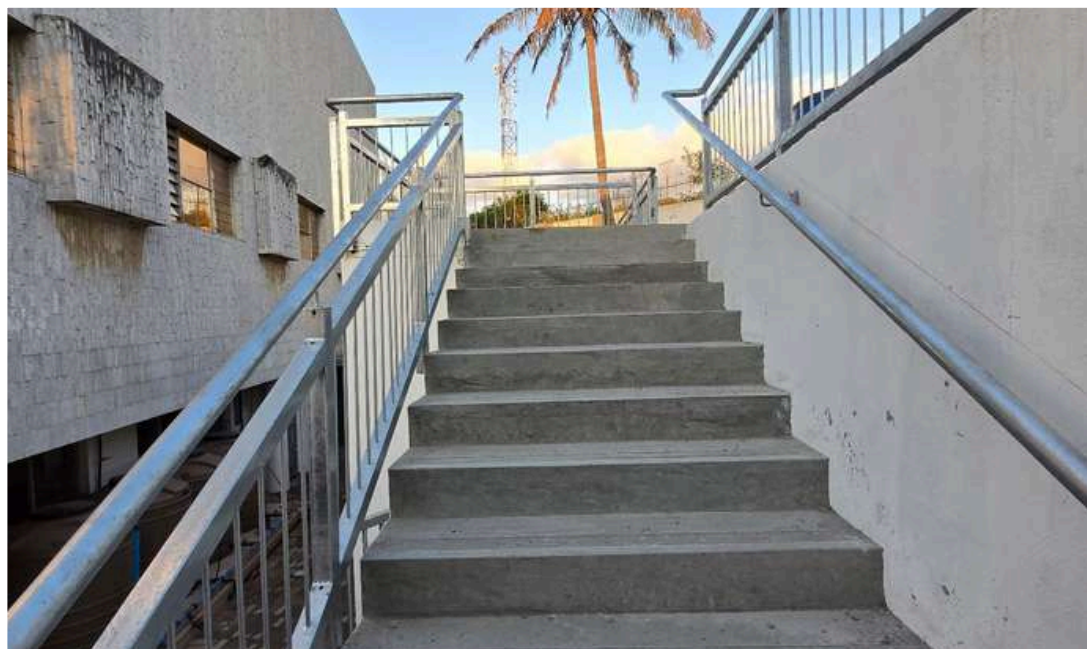

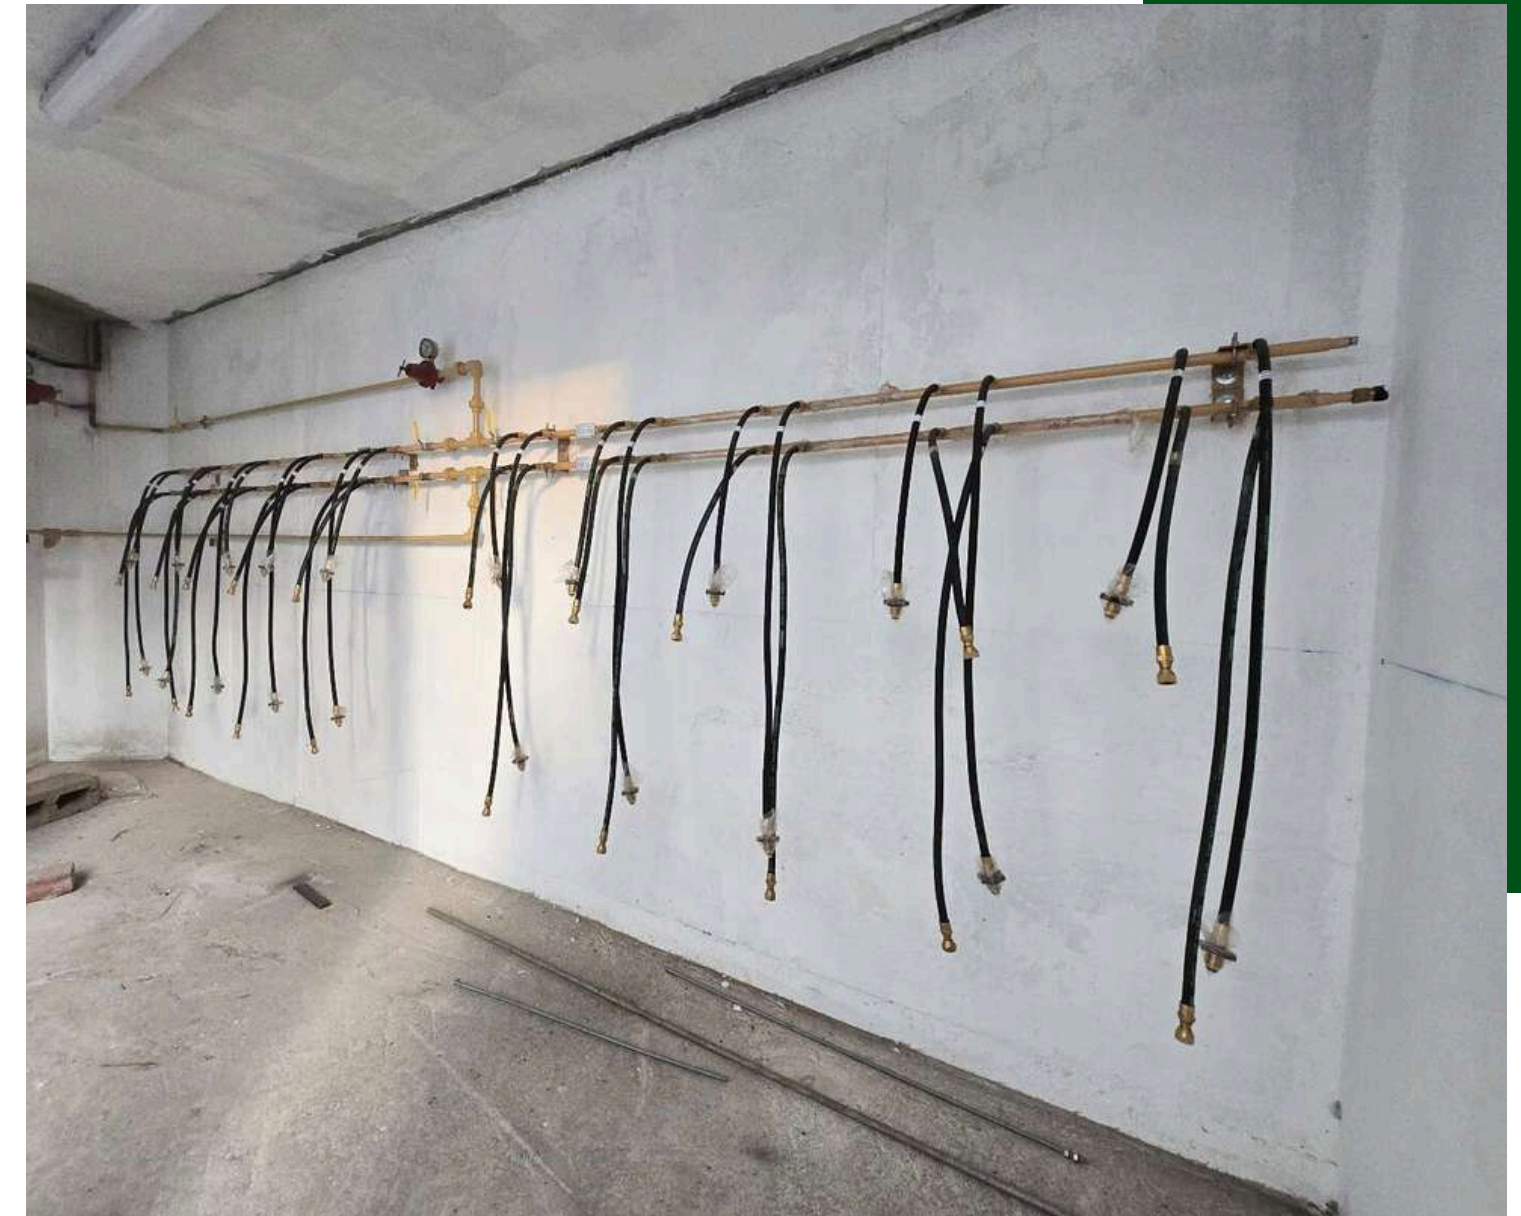

Heated Water Supply system
